

Android Developer Job Description

toorbee is a travel and tourism international company with offices in Greece and abroad offering a wide range of services through its on-line B2B transaction system. **toorbee** intends to fully develop it to accommodate its multiple business locations. This transaction system is able to create and process bookings, manage the company's offerings and inventory/trade flow as well as multi-location requests; new requirements lead to further development, though.

Responsibilities:

- Work together with company staff to implement platform's mobile app (Android version) ;
- * Work under strict deadlines following specifications to develop the mobile app;
- Work as a team to integrate the mobile app with the platform's API;
- Work together with our team to test and debug the mobile app.

Requirements:

- Knowledge of Android Java programming is a must;
- Knowledge of REST/JSON and UI principles are preferred;
- Additional knowledge of web technologies is preferred but not required;
- General knowledge about mobile development and systems architecture should be apparent;
- Code must pass basic requirements for running on devices like tablets and smartphones;

Qualification:

- Preferred graduates in computer science or computer engineering with knowledge and skill of developing an Android app;
- Good communication skill and willingness to work together with other people;
- Self-discipline in order to finish work on a timely basis.

Code position: AD0218, contact e-mail: careers@toorbee.com
