

Node.js Full-Stack Developer Job Description

Toorbee is a travel and tourism international company with offices in Greece and abroad offering a wide range of services through its on-line B2B transaction system. **Toorbee** intends to fully develop it to accommodate its multiple business locations. This transaction system is able to create and process bookings, manage the company's offerings and inventory/trade flow as well as multi-location requests; new requirements lead to further development, though.

Responsibilities:

- Work together with company staff to develop business transaction module and flow;
- Work as a team to develop this web based transaction system;
- Work together with our team to run this website on the development site.

Requirements:

- Experience with back-end technology with Node.js (Nestjs, Express.js, Koa.js), Git, build tools (npm, Webpack).
- Experience at writing and maintaining tests, in code analysis tools like ESLint, NoSQL data stores like MongoDB, Docker/Kubernetes, GraphQL.
- Excellent knowledge and understanding JavaScript, TypeScript, (ECMAScript6+).
- Good understanding of RESTful API, WebSockets, Node.js security issues and OOP, FP, FRP programming.
- Strong fundamental computer science skills (OOA,OOD, data structures, loose coupling, tight coupling, MVC architecture, microservices, event-driven architecture, event sourcing, saga pattern).
- Hands-on experience in libraries like vue.js or frameworks like Angular will be an advantage.
- Knowledge of Elasticsearch, Logstash, Kibana, RabbitMQ, gRPC, Redis if preferred but not required.

Qualification:

- Preferred graduates in computer science, computer engineering and management information system majors with knowledge and skill of developing a website;
- Good communication skill and willingness to work together with other people;
- Self-discipline in order to finish work on a timely basis.

Compensation:

- If traveling is needed, company will compensate for luncheon and trip expenses.
